## Visual Basic

### Ready for Board/ University Exams

#### Index

#### **Theory**

1. Basics of Visual Basic
2. Advantages of VB 6.0
3. Features of Visual Basic
4. Visual Basic Project
5. Visual Basic Environment
6. Types of applications
7. Definition of common terms in Visual Basic
8. Files used in VB & their extensions
9. Toolbox
10. Complete view of VB Window
11. Standard Toolbar
12. Property window
13. Prefixes used for objects
14. Data types in Visual Basic
15. Suffixes for Literals
16. Operators in Visual Basic
17. Variable Declaration
18. Scope of the variable  
Local, Static, Private, Public
19. Data type prefixes for variable
20. String Declaration
21. Common Properties for most of the VB controls
22. Form Properties
23. Label control & its properties
24. Text Box control & its properties
25. Command Button Control and its properties
26. List Box control & its properties
27. Combo Box control and its properties
28. Check Box control and its properties
29. The Option Box
30. The Picture Box
31. The Image Box
32. The Drive List Box
33. The Directory List Box
34. The File List Box
35. Timer control
36. Events
37. Common Form Events
38. Message Box
39. Input Box
40. If...Else...End If control structures
41. Select Case ... End Select control
42. Do ... Loop control
43. For ... Next control
44. With ... End With control
45. IIF statement
46. Choose function
47. Numeric Functions  
Int( ), Fix( ), Abs( ), Sqr( ), Exp( ), Log( )  
Cos( ), Sin( ), Tan( ), Rnd( ), Round( ), Sgn( )
48. Data Type Inspection Function  
IsDate( ), IsEmpty( ), IsNull( ), IsNumeric( )
49. Data Type Conversion Function
50. String Type Functions  
Len( ), Str( ), Val( ), Ucase( )  
Lcase( ), Instr( ), Mid( ), Left( )  
Right( ), Ltrim( ), Rtrim( ), Trim( )  
Asc( ), StrReverse( ), Replace( )
51. Date and Time functions  
DateAdd( ), DateDiff( )  
DatePart( ), DateSerial( )  
DateValue( ), Day( )  
Month( ), Year( )
52. Code Window
53. Event Procedure
54. Sub-procedure
55. Passing by value and passing by reference
56. Function procedures
57. Array
58. Multidimensional Array
59. Control Array
60. Debugging
61. Step Modes in debugging  
Step Into, Step Over, Step Out
62. Immediate Window / Debug Window
63. Local Window
64. Watch Window
65. Types of Interface  
Single Document Interface (SDI)  
Multiple Document Interface (MDI)  
Explore Style
66. Steps for interfaces MDI, SDI, Explorer style
67. Menus / Menu Bar
68. Creating Tool Bar
69. ActiveX / Components
70. Common Dialog Box Controls  
Color, Font, Open, Print, Save, WinHelp
71. File Handling
72. Open( ) statement
73. Close( ) statement
74. Write# statement
75. Print# statement
76. Input# statement
77. EOF( ) statement
78. Put statement
79. Get statement
80. The Database features in VB 6.0
81. VB Data Control
82. Database connectivity using VB Data control and Visual Data Manager
83. Designing a database in MS-Access as backend
84. ADO Data Control
85. Data Interaction using "Data Form Wizard"
86. Data Environment Designer
87. Data Bound Grid Control
88. Report Designer
89. **Question Bank**

#### Programs

#### **41 Programs**
